The Netherlands

Adding value by logistics innovation and sustainable supply chain

With a long history in international trade, a strategic location and excellent transport infrastructure, including the Port of Rotterdam and Amsterdam Airport Schiphol, the Netherlands is often considered the logistics gateway to the European market. Over the past decades, many international companies have chosen our country as a location for their European distribution centres, benefiting from its business-friendly tax and customs environment and well-educated, English-speaking workforce.

Priority sector

The transport and logistics sector is crucial to the Dutch economy and is recognised by the Dutch government as one of the country's top sectors. Its economic importance extends well beyond specialised transport and logistics service providers. When logistics activities within manufacturing, retail and other industries are included, the broader logistics function represents around 13–14% of Dutch economic activity and approximately 13.7% of employment. These figures clearly underline the broad role of logistics in supporting Dutch manufacturing, trade and international competitiveness.

Innovation

The sector is also an important driver of innovation. Innovations in supply chains globally share the goals of improving efficiency, resilience and sustainability. Like many other European economies, the Netherlands has faced shortages of space and labour, as well as growing regulatory requirements. This has accelerated the use of robotisation, automation and digital technologies in logistics operations. Many large distribution centres use robots and automated systems for order picking, sorting and the movement of goods. AI is increasingly used to improve demand forecasting, inventory management, route planning and warehouse operations, while helping companies identify disruptions and make faster, better-informed supply chain decisions.

Sustainability

The European Union is committed to the Paris Agreement and aims to reduce net greenhouse gas emissions by at least 55% by 2030 compared with 1990, on the path towards climate neutrality by 2050. The Netherlands also aims to become fully circular by 2050, while a growing number of Dutch cities have introduced zero-emission zones for commercial vehicles. The logistics sector has an important role in meeting these ambitions. New distribution centres increasingly meet high standards for energy efficiency, companies are investing in zero-emission transport and the number of fully electric trucks on Dutch roads is rising rapidly, although their overall share remains modest. Reusable packaging, cleaner energy and better coordination of logistics processes through data sharing are also gaining ground.

Opportunities

In the Netherlands, we believe that global challenges are best addressed together. These developments create promising opportunities for Chinese and Dutch companies to collaborate. Exporters looking to set up or restructure their European supply chains can access advanced solutions for distributing their products efficiently across the European market. Suppliers of solutions for robotisation, automation, digitalisation and sustainability will find a large, innovative market that is ready to adopt new technologies and approaches.

HIDC

As the Holland International Distribution Council, we are pleased to bring a logistics delegation to China, with representatives of Dutch companies at the forefront of logistics innovation. During this trade mission, which includes our participation in the China International Logistics Fair in Shenzhen and a visit to Hong Kong, we look forward to meeting Chinese companies and organisations with international ambitions and discussing how we can support their plans.

荷兰

物流创新与可持续供应链，创造更多价值

荷兰的国际贸易历史悠久，地理位置优越，交通基础设施完善，鹿特丹港和阿姆斯特丹史基浦机场便是有力的例证。正因如此，荷兰被视为进入欧洲市场的物流门户。几十年来，大批国际企业把欧洲配送中心设在荷兰，看中的正是这里营商友好的税收与海关环境，以及受过良好教育、英语流利的劳动力。

重点产业

交通运输与物流业是荷兰经济的重要支柱，荷兰政府将其列为国家重点产业。而专业运输和物流服务企业，只是物流经济版图的一角。把制造业、零售业及其他行业的内部物流活动一并计入，广义物流约占荷兰经济总量的 13% 至 14%，吸纳的就业约占总就业的 13.7%。这些数字背后，是物流对荷兰制造业、贸易和国际竞争力的有力支撑。

创新

物流业同样是创新的重要引擎。放眼全球，供应链创新的方向高度一致，都在追求更高效、更有韧性、更可持续。与欧洲其他许多经济体一样，荷兰也面临空间和劳动力短缺，监管要求日趋严格。在这种压力下，机器人、自动化和数字技术在物流各环节加速落地。如今，许多大型配送中心已借助机器人和自动化系统完成拣货、分拣和货物搬运；人工智能则越来越多地用于需求预测、库存管理、路线规划和仓储运营，帮助企业及早发现供应链中断，从而更快、更有依据地作出决策。

可持续性

欧盟承诺落实《巴黎协定》，力争到 2030 年将温室气体净排放量在 1990 年的基础上至少减少 55%，并朝着 2050 年实现气候中和的目标迈进。荷兰同样定下 2050 年全面实现循环经济的目标，越来越多的荷兰城市也已为商用车辆划设零排放区。要实现这些目标，物流业的作用至关重要。新建配送中心越来越多地达到高标准能效要求，企业纷纷投资零排放运输，荷兰道路上的纯电动卡车数量增长迅速，但总体占比仍不算高。与此同时，可重复使用的包装、更清洁的能源，以及借助数据共享实现的物流协同，也在逐步普及。

机遇

我们始终相信，全球性挑战唯有携手才能化解。上述趋势正为中荷企业合作打开广阔空间：有意搭建或重构欧洲供应链的出口商，可以在荷兰找到先进方案，把产品高效地分销到欧洲各地；而提供机器人、自动化、数字化和可持续解决方案的供应商，则会看到一个规模可观、创新活跃、乐于接纳新技术和新做法的市场。

荷兰国际物流协会（HIDC）

作为荷兰国际物流协会，我们很高兴率物流代表团访问中国，成员均来自走在物流创新前沿的荷兰企业。此行期间，我们将参加在深圳举办的中国（深圳）国际物流与供应链博览会，并赴香港访问。我们期待与有志于开拓国际市场的中国企业和机构交流，助其业务在荷兰落地生根。

Introducing the Netherlands

How do the Dutch make a difference?

By working together to develop innovative solutions to some of the world's most pressing challenges.
The Dutch way of thinking and working has been shaped by centuries of living in the low-lying delta of the Netherlands. Faced with the constant challenge of managing water and making the most of limited space, people learned to cooperate, think ahead and turn complex problems into practical solutions.
This innovative and collaborative drive remains firmly embedded in Dutch society.

Today, businesses, government, knowledge institutions and communities join forces to address challenges in areas such as urbanisation, energy, food, health and security. Their approach is inventive and pragmatic, with an openness to new ideas and international cooperation.
The result is a flourishing and resilient country in which cities, industry, agriculture and nature are connected through smart infrastructure. Building on experience from the past, the Netherlands continues to innovate for the future—and is keen to share its knowledge and work with others towards a more sustainable and liveable world.

Amsterdam Airport Schiphol

Amsterdam Airport Schiphol has strengthened its position as one of Europe's leading air cargo gateways by focusing on what matters most to global supply chains: connectivity, reliability and collaboration.
One of our most significant accomplishments has been creating an integrated cargo ecosystem in which airlines, handlers, forwarders, customs authorities and logistics providers work closely together to continuously improve cargo performance.
Schiphol's strength starts with its location. Situated in one of Europe's strongest economic regions and close to a dense concentration of shippers, Schiphol serves as the natural gateway of Western Europe to global markets.
Cargo is a strategic priority for Royal Schiphol Group. Significant investments in infrastructure, Cargo City developments in Schiphol Southeast infrastructure and digitalisation are helping us increase productivity, improve predictability and support future growth. As a result, airlines benefit from access to a large cargo market, a highly collaborative community and a gateway designed to create long-term value for their operations.

阿姆斯特丹史基浦机场

阿姆斯特丹史基浦机场始终聚焦连接、可靠与协作这三大全球供应链核心诉求，已巩固其作为欧洲领先航空货运门户之一的地位。
我们最重要的成就之一，是打造了一体化货运生态：航空公司、地面服务商、货代、海关与物流服务商在此紧密协作，持续提升货运绩效。

史基浦的优势源自其得天独厚的地理位置：地处欧洲经济最发达的区域之一，周边货主高度集聚，是西欧通向全球市场的天然门户。

货运是皇家史基浦集团的战略重点。集团持续投入基础设施、史基浦东南区货运城建设与数字化，推动生产效率与运营可预测性同步提升，为未来增长奠定基础。由此，航空公司得以对接庞大的货运市场、融入高度协作的行业生态，依托这座着眼长期价值的门户机场拓展业务。

Eduard Molkenboer

Eduard Molkenboer is Head of Schiphol Cargo at Amsterdam Airport Schiphol. With extensive experience in logistics and supply chain management, Eduard works with a dedicated team to strengthen Schiphol's cargo network through operational excellence, supply chain optimization and close collaboration with partners across the cargo community, Cargonaut and Maastricht Aachen Airport.

Eduard Molkenboer，史基浦货运负责人

爱德华·莫尔肯布尔现任阿姆斯特丹史基浦机场货运负责人。凭借在物流与供应链管理领域的丰富经验，他带领一支专业团队，通过卓越运营、供应链优化以及与货运生态圈各方伙伴（包括Cargonaut、马斯特里赫特亚琛机场）的紧密合作，持续强化史基浦的货运网络。

Customs Administration of the Netherlands

The Customs Administration of the Netherlands monitors goods crossing the European Union's external borders to protect Europe and its citizens. We pay particular attention to matters related to safety, health, the economy and the environment.
Customs contributes to a strong, attractive, and fair economy by:

- Ensuring that companies comply with rules that prevent products from entering the market at below-market prices
- Preventing the import of counterfeit goods
- Ensuring clear customs procedures, well-functioning declaration systems and minimizing administrative burdens
- Checks that fit the risks, at logical locations and moments
- Trade policy measures, to prevent certain industries from being driven out of competition

We ensure that citizens and companies know the rules and comply with them; we combat tax fraud. This concerns excise duties, import duties, countervailing duties and anti-dumping duties. Services are the foundation of our work.

荷兰海关总署

荷兰海关总署负责监管跨越欧盟外部边境的货物流动，以保护欧洲及其公民的安全。我们特别关注与安全、健康、经济和环境相关的事务。
海关通过以下方式助力打造强大、具吸引力且公平的经济：

- 确保企业遵守规则，防止产品以低于市场价格的水平进入市场；
- 防止假冒商品进口；
- 确保海关程序清晰明了、申报系统运作良好，并最大限度减少行政负担；
- 在合理的地点和时机进行符合风险特征的检查；
- 实施贸易政策措施，以防止某些行业被逐出竞争。

我们确保公民和企业了解并遵守规则；我们打击税收欺诈，包括消费税、进口关税、反补贴税和反倾销税。服务是我们工作的基石。

Odin Warehousing & Logistics

Odin Warehousing & Logistics is a fast-growing logistics provider with state-of-the-art warehousing at the Port of Rotterdam. Located just 1 km from the Maasvlakte terminals, Odin combines warehousing, customs, transport and forwarding in one integrated operation.
Our services include warehousing, cross-docking, fulfillment, customs formalities, fiscal representation, AGP storage for excise goods and European distribution. With our own electric truck fleet, approximately 50 trailers and a presence in both Poland and the UK, we offer efficient connections throughout Europe and between the UK and mainland Europe. Odin delivers reliable, flexible and cost-efficient logistics solutions.

Odin物流仓储公司

Odin物流仓储公司在鹿特丹港拥有一流仓储设施，距马斯夫拉克特（Maasvlakte）码头仅1公里。依托这一区位优势，我们将仓储、关务、运输与货代整合为一体化运营。
我们的服务涵盖仓储、越库、订单履约、关务手续、税务代表、消费税货物保税仓储（AGP）与欧洲配送。公司配备自有电动卡车车队与约50辆挂车，业务延伸至波兰和英国，由此高效连接欧洲各地以及英国与欧洲大陆，为客户提供可靠、灵活、高性价比的物流服务。

Tobias Monster

Tobias joined Odin Warehousing & Logistics in 2022 and started his career within the Customer Care team. Over the following years, he played an important role in developing and professionalizing the department, improving service levels and creating a stronger and more structured customer approach within Odin.
Today, Tobias manages the Sales team. In this role, he focuses on growing Odin's customer base, developing new business opportunities and increasing Odin's visibility in the European logistics market. His background in Customer Care gives him a practical understanding of both customer expectations and daily logistics operations. This helps him translate commercial opportunities into solutions that also work in practice.

Tobias Monster, 销售经理

Tobias于2022年加入Odin，从客户关怀团队起步。此后数年，他在部门建设与专业化方面发挥了重要作用，不仅提升了服务水平，也使Odin的客户服务体系更加有力、更加规范。

目前他负责销售团队，专注扩大Odin的客户基础、开拓业务机会、提升Odin在欧洲物流市场的知名度。客户关怀的从业背景，使他既能深入理解客户诉求，又熟悉日常运营，从而将商业机会转化为切实可行的方案。

Tobias作风务实，重视建立长期客户关系，坚信每一个物流难题都有解决之道。
